ADVANCED SUBSEA's Global Approach for Deepwater Survey Construction Support Consulting Services.

This service is dedicated to Oil&Gas, Engineering&Construction Cies and is available in Europe, GOM, Brazil and West Africa

1- Construction Support & Survey Consulting Services

Advanced Subsea developed a GLOBAL APPROACH for Survey/ Rov consultancy services taking into account the various requirements of project teams, We operate like an in-house Survey Department:

* Whatever personnel is required, we provide backing by an Expert to insure optimum service. In addition, you will have free access to AS Hotline for any subsea/ survey related question.

* We provide:

- Survey Experts for developing method statements at tender stage.
- Survey Experts for contributing to decision making at the beginning of the project,
- Senior surveyors for reviewing/ developping procedures of Positioning and Survey
- Subsea engineers for ROV/ subsea procedures.
- Various Experts for coordination/ interface meetings
- Survey Reps for offshore operations (pre-surveys, Construction Support Vessels, Construction Vessels).

Note : ISO 9001 and Knowledge Management Methods

The above includes the use of standard document frames in order to produce the scope of work, method statements, procedures, tender technical documents, etc...

Throughout the duration of the project, Our team maintains an updated positioning database and reference document base including all information required by offshore consultants to become immediately operational.
